ACCESS TOWERS

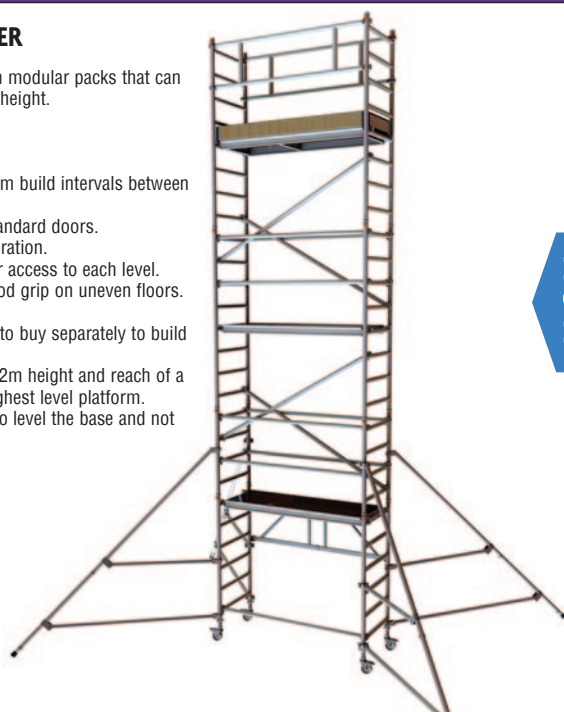

new

MODULAR ACCESS TOWER

A professional tower that comes in modular packs that can build a tower up to 5.6m platform height.

- EN1004-1 : 2020.
- Max load: 208kg.
- Order separate packs that have 2m build intervals between each tower size.
- Easily moved and fits through standard doors.
- One handed lock and release operation.
- Sturdy platform with trapdoor for access to each level.
- Adjustable stabilisers provide good grip on uneven floors.
- For indoor or outdoor use.
- All extension packs are available to buy separately to build the tower height required.
- Safe working height is based on 2m height and reach of a person whilst standing on the highest level platform.
- NB only use the adjustable legs to level the base and not to gain extra height.

TELESCOPIC SCAFFOLD TOWER

The telescopic scaffold tower has a wide range of uses from maintenance work, decorating, through to light industrial tasks. The unique patented telescopic operation allows the tower to easily be transported, stored or erected.

- 7 adjustable platform heights from 0.33m up to 2m at 25mm increments offering a working height up to 4m.
- Operates as a podium with low level fixed height options of 33cm and 61cm.
- Fully erected in under 3 minutes saving down time and man hours.
- Can be transported in a small van or estate car.
- Comprises only two parts - tower and platform (no more leaving parts in the yard).
- Large folding aluminium work platform (1.40m x 0.7m) with climb through hatch.
- Integral telescopic hand and knee rail.
- Integral platform stabilisers.
- Integral stabilising legs with 5 optional positions and lockable castors.
- Single person operation.
- Minimal product footprint for ease of transportation and storage.
- Includes toeboards.
- Conforms to EN1004.
- Weight only 70kg.
- SWL 150 kg.
