MOBILE SCAFFOLD TOWER

This mobile tower is approved to EN1004. The compact design can be stored and transported inside a small van and erected by one person in three minutes, with just the minimum of training!

Gravity latches make rung-by-rung height adjustment effortless allowing the tower to be quickly adjusted to your desired height.

Compact closed dimensions of 1.34m opens up to 3.1m x 2.0m platform.

- Safe working load of 150kg.
- Platform size: 1540 x 600mm.
- 250mm adjustable sections.
- Multi height adjustment up to 2.8m.
- Just two components: tower and folding anti-slip platform.
- No loose components to lose or leave behind.
- Fitted with four adjustable height 150mm dia locking castors.
- Foldable toe boards integrated to the platform.
- Stabilisers are millimetre adjustable for uneven ground.
- Folding hand and knee rails.
- Industrial strength design and components for frequent use.
