**Our expert says**  
In need of a huge loading capacity?

## HEAVY DUTY INDUSTRIAL PLATFORM TRAILERS

The ball bearing turntable transmits thrust and traction forces over a large surface and does not have any friction thus reducing wear on trailer parts. A drawbar stop prevents injury to operators feet. A lock holds drawbar vertical when not in use. Spring loaded retaining ball in the coupling pin is fitted to eliminate self-releasing when towing.

- Tow eye 50mm diameter, special sizes or requirements available.
- Rugged all-welded construction.
- Sealed ball bearing turntable giving high performance.
- CE marked and plated.
- 3 year guarantee.

Depending on required size, available with timber top or chequer-plate.

**UK engineered**  
to give a long, productive life
