

POWERSTATION CHARGING LOCKERS

POWERSTATION CHARGING LOCKERS

Theft of powered tools, equipment and mobile tech products are increasingly common especially when those items are left on site for battery charging. The PowerStation is a secure charging locker with lockable individual compartments thus allowing charging equipment within the locker to be left unattended, giving a good degree of safety protection from thieves.

- 6 or 12 compartment models suitable for site use.
- Choice of camlock or padlock compartments (padlocks not supplied).
- RCD protected at the source.
- 240 volt power supply.
- Perforated doors for ventilation.
- 1mm thick steel construction with powder coated finish.
- Upgrade option to USB sockets at minimum quantity 20.
