- Quality accredited BS EN ISO 9001:2000.
- Detailed structural drawings and calculations.
- Fast, efficient installations by our accredited installation teams.

## YOUR PLATFORM FOR FUTURE GROWTH

Mezzanine floors provide high quality, extremely cost effective space in areas that are often never used. When an organisation expands the need for extra space is crucial, people naturally think of expanding outward. Don't do the same! Think cubic space not floor space. A mezzanine floor makes use of the total space available to you, offering significant cost savings when compared to alternatives.

- Mezzanine floors are ideal for retail storage, production, warehouses, distribution and office solutions.
- Mezzanine floors can be supplied in a single level or multi-tier arrangement.
- All structures are individually designed to suit each application and facility.
- National type certification for fast track building regulation approval.
- Fire rated designs and column casings.
- Structures designed to BS6399, BS5950, BS449 and the latest building regulations.
- Structures conform to SEMA and DETR approved guidelines.
