

GRIT/SALT SPREADERS & SNOW CLEARANCE

GRIT AND SALT SPREADERS

Professional grade spreaders designed specifically for winter salt and grit. These are highly robust machines designed to resist aggressive salt corrosion and operate efficiently in icy conditions.

10643

Spreader SW 20-C and SW 35-C

- For use in tough winter conditions.
- For different spreading materials.
- With robust agitator finger.
- Steel push rod, three length settings.
- With adjustable spread width limiter.
- With strainer insert.
- Air-filled rubber tyres with winter tread.
- Collapsible support foot.

10642

KS 35-E

- For medium spreading areas.
- Quantity to be spread can be precisely and continuously adjusted via the eccentric disk.
- Collapsible support foot.
- Adjustable length push rod.
- Axle divided in the middle, moves around corners easily.
- Spreading width of 60cm makes this ideal for paths.
