

## ANTI-MIST DUST LIQUID GOGGLE

- Polycarbonate lens and body offer protection against medium energy high speed particles at 120m/s (270 mph).
- The optical qualities of the lens comply with the requirements of optical class 1. EN 166 1.B.3.4.

## STEALTH 9100

- Soft dual injection goggle provides a soft comfortable universal fit with a high level of protection from splash/dust and impact.
- Comes complete with black soft elasticated, military style protection sleeve to prevent lens becoming scratched when not in use.
- Anti-fog and scratch resistance. Clear lens also blocks 99.9% of ultraviolet radiation.
- Conforms to EN1663.4.B.T.N

## EVO GOGGLE

- ID Vent, Class 1 optics, B grade impact.
- N Class lens offer anti-mist and anti-scratch to keep the lenses scratch and fog free for longer.
- Conforms to EN166.1.B - Tested to resist impact of a 6mm steel ball fired at 270mph (430kph).
- Also offers 99.9% protection against UV radiation.
- EVA foam on the goggle housing provides a comfortable fitting to a wide range of facial profiles.
- Can be used with an RX insert for prescription eyewear.
- Low profile design means the EVO Goggle™ can be worn with an industrial safety helmet or bumpcap, and is fully compatible with our Evolution® range of safety helmets and our Hardcap A1+ baseball style bumpcaps.
- Features a wide 30mm elastic headband for improved comfort and secure fit.
- Anti-mist protection.

## SAFETY SPECTACLES

In many day to day tasks flying particles can be generated and in almost all work environments eye protection is needed, but it is also mandatory in many areas. Eye injuries can translate into pain, loss of time, money and potential eyesight. From wood and paint chips to dirt, concrete particles and even nails, a workers eyes are constantly and most often at risk from impact hazards.
