60	BT028-60	£2395.64

BIRD-SHOCK FLEX-TRACK KITS

Bird-Shock Flex-Track is a low profile ledge deterrent system that is effective against all species of birds using the principle of fear and flight, teaching birds to stay away. Flex-Track is only 6mm high and is available in 3 colours to match your building structures. The Flex-Track is hard to notice close-up and virtually invisible from a distance, plus it cannot be seen when looking up from below.

- Available in kits with either mains powered 100-240V AC or solar powered 12V DC Energiser.
- Choice of 15, 30, 45 or 60m track length kits.
- Low profile electrified track that conforms to any architectural configuration. Flex-Track curves up and down as well as side to side. The stainless steel strapping follows the PVC base without wrinkling.
- Made from UV stabilised PVC and stainless steel, this product will be in service far longer than its five year warranty.

- The intermittent shock is mildly painful but does not hurt the birds in any way. It simply teaches them to stay away, long term.
- Leave up to 150mm gap between tracks unprotected on ledges.
- Not recommended to install near children or unsuspecting workers.
- Choice of colours: black, grey or stone. Please specify choice.
- Standard installations up to 150m length, enquire for longer requirements.

OPTIONAL EXTRAS

Extra Bird-Shock Flex-Track is available in 15m length rolls. Colours: black, grey and stone.

Bird-Shock Connector Kit for electrical installation. Comprises of:

- 50 x male spade terminals.
- 50 x female spade terminals.
