

FIBREGLASS GRP GRATING

Fibreglass (GRP) grating has superior strength, whilst still being very lightweight. This makes it easy to cut, lay in position or install. The grating is highly corrosion-resistant, meaning that it is very suitable for use in corrosive environments, such as chemical plants, offshore platforms and general industrial settings. The slip resistance of the material ensures the safety of both your employees and visitors in wet and dry conditions. The grating is low maintenance so it will not necessitate regular painting or coating, thus reducing your long-term costs. The typical uses include walkways, risers, platforms and industrial flooring.

GRP MINI MESH GRATING

Suitable for indoor and outdoor use. Perfect for walkways, ramps, pontoons or covers for industrial and construction sites.

- Sold as a sheet for cutting on-site or our bespoke service can supply sizes to order.
