

Heavy Duty Industrial Trailer

“For transportation of bulk goods, Action Handling is our No.1”

All our trailers are designed to comply with Health & Safety standard regulations

Following a portfolio of successfully completed projects, an Essex-based Power Station brought in Action Handling to design and manufacture a bespoke, heavy-duty industrial trailer for use with the movement of equipment around site.

A formal meeting was arranged whereby a Director from Action Handling and the Site Manager would discuss the quantity, size, weight and frequency of goods transported on an average working day. Personnel onsite were also consulted with to understand their thoughts on ease-of-use alongside safety regulations.

Following a detailed design process, a solution was compiled and implemented. The aim was to supply a bespoke, heavy-duty trailer which would easily handle the extensive workload, be user-friendly and above all safe. Contrary to standard models in the Action Handling catalogue, the bespoke trailer has a large 10m x 4m platform and a 25 ton capacity.

Specification points;

- Excellent manoeuvrability
- Extremely robust,
- Minimal upkeep
- Platform: 10m x 4m
- Capacity: 25 ton
- Finish: Safety Yellow
