

Bespoke Mesh Security Cages

“Action Handling guarantee safety & security with their storage equipment”

All our Security Cages are designed to comply with Health & Safety standard regulations

During a large-scale update of their security measures, an MOD Army Barracks based in the East Midlands appointed Action Handling to supply customised versions of their standard Mesh Security Cages.

Action Handling do list a variety of Security Cages in their catalogue and on the website. However, due to the application onsite and specific needs of this client, a number of bespoke alterations were made prior to shipping in order to fully satisfy the requirements. This project required a high level of Security Clearance and was treated as such throughout the entire design & manufacturing process. Four individual cages were supplied, each with bespoke sizes, suitable for safe & secure storage of army supplies and kit, prior to despatch to classified overseas destinations.

Standard models

Multi-purpose range of mesh storage cages, complete with mesh roof, for indoor or outdoor use. Suitable where 'light' security is required to combat theft. Standard cages are designed around our 1220mm wide x 2440mm high mesh panels. Non standard sizes available on request. Standard finish hot dip galvanised or more cost effective paint finish for indoor use.

- Construction in mild steel angles and rolled tees with weld 50mm x 50mm x 12 swg mesh infill sheet, spot welded in position, panels bolted together with M8 bolts, floor fixed with pan head screws and 6mm plastic plugs.
- Double doors are 2440mm wide, opening outwards of 2440mm height. Complete hasp and staple and shot bolts standard, and hung on 100mm steel hinges.
- Finish in either galvanised with zinc plated fixings or painted EPC grey, sandstone or yellow for indoor use.
