

Wooden Pallet Collars

“For straight-forward exporting requirements, choose Action Handling!”

All equipment is designed & manufactured to comply with Health & Safety regulations

Action Handling were recently engaged to supply a large quantity of our Wooden Pallet Collars (Catalogue page 73 – ref. A/G/R/3) for delivery to Nigeria as part of a large transformation project.

Our customer, a multinational oil & gas company, required the wooden pallet collars to transform their obsolete wooden pallets into robust storage containers. Our wooden pallet collars are designed to convert base pallets into mini bulk containers. They can store heavy, awkward or irregular shaped loads as well as just about anything that will fit inside them... Except water, that might be a bit tricky!

Specification

- Collars light to handle and able to stack up to desired height.
- Collars fold flat for storage.
- 195mm deep collars.
- Special sizes supplied to order.
- 18mm thick after planed out kiln dried timber.
- Galvanised corner hinges.

A total order of 200 Wooden Pallet Collars was confirmed and the goods were delivered to the customer's site in Nigeria within 3 working weeks. Action Handling has proficient export knowledge and was able to arrange safe & secure transit from our office in Sawbridgeworth direct to the end user.
